

Polyethylene Casico™ FR4802

Reduced Fire Hazard Jacketing Compound for Energy Cables

Description

Casico FR4802 is a thermoplastic, low smoke zero halogen (LSZH) flame retardant, natural jacketing insulation compound combining with excellent extrusion properties. The composition is based on the elements Carbon, Hydrogen, Oxygen, Silicon and Calcium. Compounds based on these elements will therefore be the only significant constituents of the combustion fumes. Other elements may be present in concentrations less than 0.1%.
